## ABOUT THE TRAINERS

**Bryan Doty • Program Development & Training Coordinator**  
Iowa-Illinois Safety Council

Bryan has been involved in manufacturing for nearly 20 years, serving on safety teams and safety committees for 15 years and 5 years as a safety coordinator for a window manufacturer. He has 3 years experience in the construction industry as a safety consultant.

Bryan is an authorized OSHA Training Institute Construction Outreach Trainer. He has the National Safety Council Advanced Safety Certificate and holds a certificate in Industrial Ergonomics. His experience and diverse background gives Bryan the ability to serve in the field as well as the classroom to help bring solutions to safety problems.

**Dennis Strawn • Trainer/Consultant**  
Iowa-Illinois Safety Council

Dennis is an authorized OSHA Training Institute General Industry and Construction Outreach Trainer. Dennis is also a certified instructor to teach National Safety Council's Advanced Safety Certificate Courses, Defensive Driving and First Aid & CPR courses.

Dennis has designed and implemented complete safety and health programs for both manufacturing and construction companies. Prior to joining the Iowa-Illinois Safety Council in 2004, Dennis worked with several community colleges throughout Iowa providing a variety of safety and health programs and seminars to a diverse audience.

Dennis combines over ten years of safety and health training, along with 17 years of firefighting, 12 years as an EMT and over 30 years of manufacturing background and experience that is utilized in the classroom with a twist of reality for the attendees, students or employees.

**Drew Knudsen • Trainer/Consultant**  
Iowa-Illinois Safety Council

Drew is distinctively qualified as an occupational safety and health trainer by many years of varied experience. He has over 20 years of agricultural experience, more than 15 years of manufacturing experience, experience within the medical field, and most recently has worked directly within the ethanol industry for the past 5 years.

His work experience within the bio-energy field has given Drew a high level of environmental knowledge associated with water, air and storm water topics. Along with his well versed field experience, excellent training techniques and high-energy personality and extensive background with machinery, machine guarding and Powered Industrial Vehicle safety, he will cultivate a strong safety culture within your organization.

(DOES NOT INCLUDE BLUEPRINTS® PACKAGED PROGRAM)

**\$400/MEMBER • \$650/NONMEMBER**  
(INCLUDES BLUEPRINTS® PACKAGED PROGRAM)

•••••

More than 32 million workers are exposed to 650,000 hazardous chemicals in more than 3 million workplaces. And hundreds of new chemical products are introduced every year, each with its own particular health and physical hazards.

OSHA implemented the Hazard Communication Standard (HCS) to help employers and employees protect themselves from chemical hazards, and reduce the incidence of related illness and injuries.

The National Safety Council created the Hazard Communication Compliance Course to help you comply with the HCS in your own facility. In just four hours, we'll walk you through the key elements of the HCS, and show you how to protect your employees and your business.

WHAT YOU WILL LEARN

(workbook included with each registration)

- How to determine if hazardous chemicals are present in your workplace
- Steps for setting up an effective hazard communication program
- Guidelines for labeling hazardous chemicals
- Using Material Safety Data Sheets (MSDS) to evaluate hazardous chemical exposures
- Promoting responsibility for initial and ongoing hazard communication activities
- Assessing gaps between the HCS and your workplace program, and identifying key actions for closing the gaps

YOU'LL BE ABLE TO

- Empower your employees to identify - and avoid - potential problems
- Assess situations where exposure to chemicals has occurred
- Reduce chemical-related illnesses and injuries throughout your facility
- Save on workers' comp and related costs

PACKAGED PROGRAM CONTENTS

This information will be covered during the seminar for ALL registrants, however the following items are only included in the packaged program with the \$400/\$500 registration.

- Explanation of the OSHA Standard
- Step-by-step instructions for How to Develop Your Hazard Communication Program
- Code of Federal Regulations
- OSHA Requirements
- Written Program Development
- Hazard Communication Written Program
- Recordkeeping Forms
- Video (15 minutes in length)
- Administrative Materials
- 5 Employee Handbooks
- Overhead Templates in Microsoft Word and PowerPoint
- Closed Captioned and also available in Spanish

*This class is awarded 4 CEUs by the National Safety Council.*
