ABOUT THE TRAINERS

Bryan Doty • Program Development & Training Coordinator
Iowa-Illinois Safety Council

Bryan has been involved in manufacturing for nearly 20 years, serving on safety teams and safety committees for 15 years and 5 years as a safety coordinator for a window manufacturer. He has 3 years experience in the construction industry as a safety consultant.

Bryan is an authorized OSHA Training Institute Construction Outreach Trainer. He has the National Safety Council Advanced Safety Certificate and holds a certificate in Industrial Ergonomics. His experience and diverse background gives Bryan the ability to serve in the field as well as the classroom to help bring solutions to safety problems.

Dennis Strawn • Trainer/Consultant
Iowa-Illinois Safety Council

Dennis is an authorized OSHA Training Institute General Industry and Construction Outreach Trainer. Dennis is also a certified instructor to teach National Safety Council's Advanced Safety Certificate Courses, Defensive Driving and First Aid & CPR courses.

Dennis has designed and implemented complete safety and health programs for both manufacturing and construction companies. Prior to joining the Iowa-Illinois Safety Council in 2004, Dennis worked with several community colleges throughout Iowa providing a variety of safety and health programs and seminars to a diverse audience.

Dennis combines over ten years of safety and health training, along with 17 years of firefighting, 12 years as an EMT and over 30 years of manufacturing background and experience that is utilized in the classroom with a twist of reality for the attendees, students or employees.

Drew Knudsen • Trainer/Consultant
Iowa-Illinois Safety Council

Drew is distinctively qualified as an occupational safety and health trainer by many years of varied experience. He has over 20 years of agricultural experience, more than 15 years of manufacturing experience, experience within the medical field, and most recently has worked directly within the ethanol industry for the past 5 years.

His work experience within the bio-energy field has given Drew a high level of environmental knowledge associated with water, air and storm water topics. Along with his well versed field experience, excellent training techniques and high-energy personality and extensive background with machinery, machine guarding and Powered Industrial Vehicle safety, he will cultivate a strong safety culture within your organization.

MEMBER PRICE: \$1,095

NONMEMBER: \$1,500

A great safety manager has the ability to lead and influence safety and health efforts in an organization. This course takes a balanced approach to safety management, addressing administrative, technical and cultural elements. You'll learn how to build your role as a safety leader in your organization, and mentor others. This course will walk you through case studies, discussions, and activities that will help you effectively manage both projects and employees. After completing this course you will receive 3.0 CEUs toward your **ADVANCED SAFETY CERTIFICATE (ASC)**.

Exercises during the class will require use of a laptop. If you do not have a laptop available for your use, please let us know in advance and we will try to accommodate your needs.

CALL IOWA-ILLINOIS SAFETY COUNCIL FOR ALL OF YOUR SAFETY TRAINING NEEDS.

IISC TRAINERS CAN SET UP ON-SITE TRAINING TO MEET YOUR SPECIFIC NEEDS.

FOR A LIST OF TOPICS OR MORE INFORMATION CONCERNING TRAINING, CALL YVETTE AT 1-800-568-2495 OR 515-276-4724, EXT. 226, OR EMAIL YVETTE@IISC.ORG

WHAT YOU WILL LEARN

The Safety Management Techniques course is designed to assist safety and health professionals who are responsible for managing employees and/or projects in safety and health efforts. Based on current safety, management, quality, and performance technology principles, this program focuses on knowledge and skills required to effectively deal with safety and health management issues from an individual and organizational perspective.

During the four and a half day course, safety and health systems and organizational structure; work processes and practices; and the needs of and relationships with employees will be explored. The scope, function, and leadership role of the safety and health practitioner are emphasized in exploring these areas.

Participants will:

- Analyze problems presented through case studies.
- Practice skills in role play situations.
- Share management techniques with other safety and health professionals in group discussions.
- Create a management plan for their company/facility.

Key Topics:

The course addresses management topics, such as:

- Safety and health management principles and practices
- Planning for safety and health management
- The scope and function of the safety and health professional
- Management and leadership styles
- Assessment of organizational practices and environmental conditions
- Individual and organizational dynamics
- Consulting, change management, problem solving, decision making, and meeting management skills
- Budget planning

Advanced Safety Certificate

The Advanced Safety Certificate helps you maximize your effectiveness as a safety manager and leader while targeting the technical and management safety skills you want to develop. The core courses in this program provide a solid foundation on which to build greater safety programs.

To attain the Advanced Safety Certificate, you must complete the **Principles of Occupational Safety and Health** course and a minimum of 5.4 CEU's among the approved classes.

Safety Management Techniques

4 day 3 CEUs/ 3 COCs

Safety Training Methods

4 day 3 CEUs/ 3 COCs

Fundamentals of Industrial Hygiene

4 day 3 CEUs/ 3 COCs
